

VMS and Agency Workforce Management @simplify

Simple to use

SimplifyVMS provides full support for all aspects of agency workforce management. It also offers end users a single, combined approach to source, procure, manage, and evaluate agency and independent contractors. It's a cloud-based vendor management system designed for desktop and mobile use, allowing for greater ease of use, configurability and system innovation.

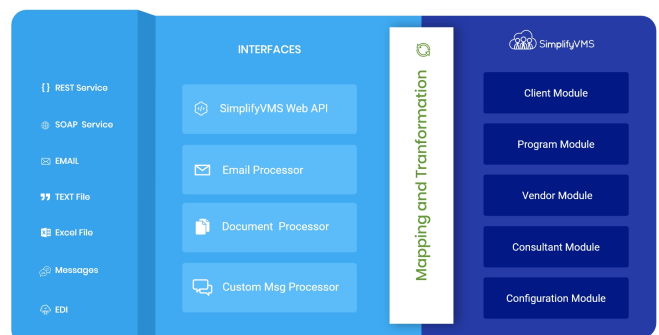

Transparent reporting

Creating actionable insights is simpler using a VMS that's designed to capture the right data-points and expose it to reporting engines. SimplifyVMS comes with a comprehensive suite of dashboards. Additionally, it offers an easy to learn custom reporting engine. Reports can be accessed on desktop and mobile. Notifications can be used to alert managers to changes by establishing KPIs and escalations in the system.

Faster deployment

SimplifyVMS has been architected on a modern elastic private cloud ecosystem which means that every customer enjoys 'their own system.' This makes it easier to configure and integrate SimplifyVMS with incumbent systems and best-in-class third-party tools such as artificial intelligence powered solutions for candidate selection, IC compliance etc.

Newest Tech Stack

The infrastructure design allows for easy configurability, flexibility, and scalability. This means that we avoid programming bottlenecks and can roll out system changes in a matter of days

Robust Integration Toolset

SSO, ATS, HRIS, ERP, IT Service Support Management (ITSSM), Portfolio and Project Management (PPM), email; customized integrations built on request

Highly Configurable

No walls configurability - end users and MSPs can configure everything in the system

Newest User Interface

B2C-like interface; clean, highly intuitive, and trainer/user friendly, using the most advanced tech interface

Vendor Neutral

Pair SimplifyVMS with any MSP or to complement an existing VMS tool

Diversity Spend Champion

Tier 1, tier 2, and ecosystem diversity spend certified

Modularized Pricing Model

Pricing per module or as a whole, flexible (SUM, fixed)

Deep Analytics Suite

Proprietary tool and third-party integrations, updated in real time

Unlimited Scale

Multi-cloud scalability, and connect safely from anywhere on the globe

Source Anywhere

Connect with any talent, anywhere on the globe, with one click of a button

People Support

Strong online community: 24/7/365 email, ticketing, and manned phone support

Mobile

Contingent workforce and statement of work (SOW) mobile apps

Implementation

3-4 weeks OOB. Supported on a global infrastructure, with a predictable, no hassle, outcome. We work side-by-side with our partners and clients throughout the implementation process

Reporting and Analytics

50+ standard reports, unlimited reports capability

Global Passport

The solution is available in multiple languages and currencies; localization and culture customized ready
